ORDER:

In the Letter first read above, the Member Secretary, Sports Development Authority of Tamil Nadu has stated that the Sports Development Authority of Tamil Nadu proposes to establish a High Altitude Training Centre (HATC) at Ooty for sportspersons. Training in HATC will increase stamina of sportspersons and there will be positive effects on performance of them. Currently, there are two HATCs in India – one located at an altitude of 2440 Meters from sea level in SAI Centre, Shillaroo, Himachal Pradesh another located at an altitude of 1460 meters from sea level at Munnar, Kerala. HATCs have the potential to draw athletes from all around the World. Though the facilities at Shillaroo and Munnar have been successful, the main challenges include restricted space and the altitude is marginal. The proposed HATC at Ooty which is at an altitude of 2240 Meters from sea level aims to redress these issues and provide World class facilities. The proposed HATC at Ooty will be in Sports Development Authority of Tamil Nadu Sports complex about 5.78 acres of land. The distinguishing feature of this High Altitude Training Centre is that it is functional throughout the year.
